*Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 10 and 11, drawn to a method of producing human mitotic kinesin protein and a bacterial cell comprising a nucleic acid encoding said protein, classified in class 435, subclass 196.
- II. Claims 6-9 and 15, drawn to a substantially pure human kinesin protein, classified in class 435, subclass 196.
- III. Claims 12-14, drawn to an assay to identify a modulator or a binding agent which binds said protein, classified in class 435, subclass 21.

The inventions are distinct, each from the other because of the following reasons:

The DNA of Group I and the protein of Group II each comprise chemically unrelated structure capable of separate manufacture, use and effect. The DNA has other utility than encoding proteins of Group II and the proteins can be made by another method such as isolation from natural sources or chemical synthesis.

The DNA of Group I and the method of Group III are patentably distinct because the DNA product of Group I is neither made nor used by the method of Group III.

Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP

Art Unit: 1652

§ 806.05(h)). In the instant case the protein of Group II may be used for antibody preparation which is different method than that of Group III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and their separate classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
